Framer motion, GSAP, Three Js, Spline

Work Experience

Lead Frontend Developer, Reboot Monkey 📍

08/2024 – present | Haarlem, Netherlands

Led a team of developers to recreate the company website, transforming it into a user-centric platform that boosted engagement and visibility.

- Spearheaded the redesign of the website with a modern, intuitive interface, making navigation seamless for users.
- Implemented advanced performance optimizations, cutting load times by 40% and significantly enhancing the user experience.
- Improved SEO strategies, resulting in a 35% increase in web traffic and inquiries within the first quarter of launch.
- Elevated the company's digital presence, positioning it as a leader in its field and increasing client conversions.
-

Directed the creation of an automation system that streamlined operations across HR, sales, and marketing departments, transforming efficiency.

- Orchestrated the integration of multiple tools into a unified system, reducing manual work by over 50% across departments.

- Designed and oversaw the development of an intuitive admin interface, providing leadership with real-time analytics for strategic decision-making.
- Fostered cross-department collaboration by automating workflows, significantly reducing bottlenecks and improving turnaround times.
- Achieved measurable time savings and increased productivity, allowing teams to focus on growth and innovation.

RMTT

Led the development of the RMTT (Reboot Monkey Time Tracker), a comprehensive tool for tracking contractor time, attendance, and billing with precision.

- Managed the end-to-end design and implementation of a custom system tailored to track and log contractor hours seamlessly.
- Automated billing processes, eliminating errors and ensuring timely, transparent payments to external contractors.
- Provided leadership with actionable insights through detailed analytics, improving resource allocation and contractor accountability.
- Strengthened contractor relationships and streamlined operations, reinforcing the company's reputation for professionalism and efficiency.

Frontend Engineer, Soft Structures.

08/2022 – 07/2024 | Lagos, Nigeria

Built a robust innovative Career (Scout4Job) platform which attracted about twenty thousand users in its first three month of soft launch.

- Collaborated closely with back-end developers and ui/ux designers to improve usability and ensure the seamless integration and interaction of web elements.
- Built an admin platform to monitor and control the analytics of everything that has to do with scout4job users and it's business side. with improved graphical visualisation and charts, data visualisation was easily accessible and controlled.
- Built various web pages with regards to other projects like a collaborative career building partner(WLB) increasing their online presence and their customer rating by 40%.
- Built a Scout4Job Business platform which allows users upload business profiles and ads on the general scout4job platform, which was also a source of income for the platform.

As a co-frontend engineer on NEURMS, a leading CRM application transforming customer and sales management, I contributed to driving significant growth. Collaborating on strategic initiatives, I played a key role in improving customer satisfaction and ratings. Through practical enhancements and user-focused features, Neurms optimized internal processes and attracted new clients, resulting in increased customer acquisitions.

- Implemented frontend enhancements and optimizations within Neurms application, resulting in improved user experience and streamlined workflows.
- Collaborated with the frontend development team to identify and address user pain points, leading to tangible improvements in customer satisfaction metrics.
- Introduced innovative features and functionalities to Neurms' frontend interface, enhancing client engagement and driving positive feedback from users.

Frontend Developer, Paybuymax tech

01/2021 – 05/2022 | Lagos, Nigeria

- Collaborated closely with back-end developers and web designers to improve usability and ensure the seamless integration of front-end elements with server-side logic.
- Implemented responsive design principles to ensure the website functioned effectively across various devices and browsers.
- Utilized modern JavaScript libraries and frameworks, such as React and Next Js to build interfaces
- Stayed updated on industry trends and emerging technologies, applying this knowledge to drive innovation at PayBuyMax.

Web developer, Smartfarm Tech

02/2019 – 04/2020 | River state, Nigeria

- Assisted in the development and design of the company's website, working closely with a team of experienced developers.
- Utilized front-end technologies like HTML, CSS, and JavaScript to create intuitive and responsive user interfaces.
- Collaborated with back-end developers to integrate front-end elements with server-side logic, ensuring seamless functionality.
- Participated in the full software development lifecycle, including requirement analysis, development, testing, and maintenance.
- Worked with the team to ensure the website is responsive and works well across various devices and browsers.

- Continually updated technical knowledge and skills by attending in-house and external courses, reading manuals and accessing new applications.
